## INVITATION

Osteoarthritis (OA) is a degenerative disease of the joints and the most common form of arthritis that causes pain and mobility limitation and, thus, reduces independence and overall quality of life. Osteoarthritis is a complex disease in which biochemical and biomechanical factors are involved and occurs mostly in the weight-bearing joints of the lower limbs, such as the hip and in particular the knee.

This conference will provide new insights, towards the adoption of multi-scale holistic analysis, where patient-specific information from various levels, including molecular (e.g. biochemical/inflammatory biomarkers), cell, tissue, and whole body, will be integrated and combined with information from environmental, behavioural and social risk factors to generate robust predictors for new personalised interventions for delaying the onset and/or slowing down the progression of OA.

Join our discussions on how a combination of mechanistic computational models, simulations, and big data analytics can target patient-specific OA prediction and interventions. Overcoming the limitation of the current treatment interventions, Augmented Reality (AR) empowered interventions allow patients to experience the treatment as more enjoyable, resulting in greater motivation, engagement, and training adherence.

The medical care industry, research & education communities, stakeholders, and other relevant initiatives in the field of Osteoarthritis prevention, will gather together aiming to improve healthcare by transforming and accelerating the OA diagnosis and prediction based on a more comprehensive and holistic understanding of disease pathophysiology, dynamics, and patient outcomes.

This conference is held in the framework of the EU-funded OActive project: “Advanced personalised, multi-scale computer models preventing OsteoArthritis”, and will be attended by the EC Project Officer.

## AGENDA

*The Conference Agenda time is in Central Europe Summer Time (CEST)*

### PLENARY SESSION

*Chairs : **Saila Rinne**, OActive Project Officer, Head of Policy Sector, DG CONNECT, Unit eHealth Well-Being and Ageing, European Commission*

***Prof Kyriacos Felekis**, OActive project coordinator, Professor in the Department of Life and Health Sciences, University of Nicosia, Cyprus*

09:00-09:10

#### **Opening speech**

***Saila Rinne**, OActive Project Officer, Head of Policy Sector, DG CONNECT, Unit eHealth Well-Being and Ageing, European Commission*

09:10-09:20

#### **OActive Project Vision**

***Prof Kyriacos Felekis**, OActive project coordinator, Professor in the Department of Life and Health Sciences, University of Nicosia, Cyprus*

09:20-09:30

#### **Ethics related activities**

***Mahault Piéchaud Boura**, Legal Consultant, Timelex, Belgium*

**23** APRIL  
2021

### SESSION I : OSTEOARTHRITIS BIOMARKERS EVALUATION IN VIVO

*Chairs : Prof Christoforos Giannaki, Assistant Professor in the Department of Life and Health Sciences, University of Nicosia, Cyprus*

*Dr Ramon Messeguer, Head of the Drug development Area Health and Biomedicine Department, Leitat Technological Center, Spain*

## AGENDA

### SESSION III: IN SILICO MODELS

*Chairs: Prof Bill Baltzopoulos, Biomechanics, Liverpool John Moores University, UK*

*Prof Konstantinos Moustakas, Associate Professor in the Electrical and Computer Engineering Department, University of Patras, Greece*

13:00-13:20

#### **Musculoskeletal Biomechanics modelling**

*Dr David Britzman, Research Associate in Biomechanics, Liverpool John Moores University, UK*  
*Dr Dimitris Tsaopoulos, Researcher on computational modeling and biomechanics, CERTH, Greece*  
*Prof Konstantinos Moustakas, Associate Professor in the Electrical and Computer Engineering Department, University of Patras, Greece*

13:20-13:35

#### **Musculoskeletal models and joint loading: a quest towards dynamic consistency**

*Dario Cazzola, Senior Lecturer (Associate Professor) in Biomechanics, Department for Health, University of Bath, UK*

13:35-13:50

#### **Deep learning-based Cardiac Magnetic Resonance Image Analysis for Improved Guidance of Repaired Tetralogy of Fallot Arrhythmia Interventions**

*Dr Archontis Giannakidis, Assistant Professor in Data Science, School of Science and Technology, Nottingham Trent University, UK*

13:50-14:05

#### **Impact of the in silico musculoskeletal models**

*Prof Bill Baltzopoulos, Biomechanics, Liverpool John Moores University, UK*  
*Prof Paulo Lisboa Professor in Applied Mathematics, Liverpool John Moores University, UK*

## AGENDA

### SESSION IV: ICT-BASED PERSONALIZED MODELING AND INTERVENTIONS

*Chairs: Dr Dimitris Tsaopoulos, Researcher on computational modeling and biomechanics, CERTH, Greece*

*Dr Ioanna Katsavou, Chemical Engineer, Dissemination Manager at Axia Innovation, Germany*

- 14:05-14:20      **Real-time Musculoskeletal Kinematics and Dynamics Analysis Using Marker- and IMU-Based Solutions in Rehabilitation**  
*Dr Dimitar Stanev, Postdoctoral researcher, École Polytechnique Fédérale de Lausanne, Switzerland*
- 14:20-14:35      **Automatic generation of personalized skeletal models of the lower limb using the open source STAPLE toolbox**  
*Luca Modenese, Research Fellow, Imperial College London, UK*
- 14:35-14:55      **Impact of augmented reality (AR) interventions in Osteoarthritis**  
*Prof Konstantinos Moustakas, Associate Professor in the Electrical and Computer Engineering Department, University of Patras, Greece*

14:55-15:10      **Short break**
